Our Company

Gias has been operating for almost 50 years in the farming and production of frozen foods. It is present in all distribution channels with an extensive line of product offerings. Gias is strongly focused in developing customized Private Label programs for our domestic and international clients, and we guarantee high quality standards by directly following the horticultural supply chain, at the base of its productions.

In recent years we have directed our efforts towards reducing energy consumption, in line with the greenhouse gas emission reduction targets enshrined in the Kyoto Protocol. We have invested in renewable energy, in the optimization of water resources, in the recycling of waste through their reuse in the production process; we have embarked on processing products from integrated pest management and organic farming; we strive to recover processing scraps and waste, which are used by farmers as animal feed.

Products Range

Gias produces a complete range of products covering all market sectors of Retail, Food Service, Industrial. With using a mix of innovation and tradition, we can consistently bring new product offerings to market. We are always focused on new market request, but we also have in our portfolio an extensive range of conventional, organic and non-GMO products that we have available to meet the customers needs. All of our vegetable products are grown without synthetic pesticides and herbicides, and all our products are free of preservatives, artificial flavors and artificial colors.

Product Range: Ready Meals (pastas, grains, rice, gratin, gluten free options); Vegetables Rices and Spirals (cauliflower, butternut squash, broccoli, carrot, zucchini); Legumes and Grains; Grilled, Steamed or Blanched Vegetables; Mashed and Soups (cauliflower, potatoes, sweet potatoes, carrots, broccoli); Grilled marinated vegetables; Baked Products (veggie pizzas, piadinas, plant based gluten-free pizzas); Breaded vegetables not prefried.
